ABOUT ME

Motivated and adaptable Junior Software Engineer with hands-on experience in developing scalable web applications and SaaS solutions. Skilled in modern JavaScript frameworks, backend technologies, and database systems. Strong team player with a proven ability to deliver quality results under tight deadlines.

PROJECTS

- **OJC Linux Fund**

Developed a dual-panel platform for a non-profit organization, enabling super admins and registered organizations to coordinate fundraising events. Implemented secure onboarding workflows and management dashboards.

- **Safety Cam AI**

Built an Admin Dashboard and SaaS solution designed to enhance safety by detecting registered U.S. criminals through image uploads and video streaming analysis.

EXPERIENCE

DEC 2024 - NOW
BharatLogic

Software Engineer
- Performed debugging and troubleshooting of existing codebase for bug fixes.
- Collaborated with other developers to ensure proper integration of components into the application.
